DETAIL ACTION

Information Disclosure Statement

1. The information disclosure statement filed on April 15, 2004 does not fully comply with the requirements of 37 CFR 1.98(b) because the references at section AE, AF and AG do not provide validate dates. The applicant fails to correct the matter by no response to telephone calls made on July 14, 17 and 18 of 2006, therefore, the references has been crossed out for not consideration at this time. Since the submission appears to be *bona fide*, applicant is given **ONE (1) MONTH** from the date of this notice to supply the above mentioned omissions or corrections in the information disclosure statement. NO EXTENSION OF THIS TIME LIMIT MAY BE GRANTED UNDER EITHER 37 CFR 1.136(a) OR (b). Failure to timely comply with this notice will result in the above mentioned information disclosure statement being placed in the application file with the noncomplying information **not** being considered. See 37 CFR 1.97(i).

Reasons For Allowance

2. Claims 1-30 are allowed.
3. The following is an examiner's statement of reasons for allowance: the prior art of record fails to disclose an efficiency structure of field emission display for improving image brightness by comprising a cathode plate, an anode plate having a transparent electrode on a substrate and a phosphor on a portion of the transparent electrode, in each pixel; a gate plate having gate holes of at least 10 um and a gate electrode around the top of the gate holes, said gate holes having an inclined inner wall; and spacers for supporting the gate plate between the cathode plate and the anode plate, wherein the field emitter of the cathode plate is constructed to be opposite to the phosphor of the anode plate through the gate holes, and is formed by vacuum packaging as required in claim 1. Claims 9, 17 and 24 have a similar allowable feature as claim 1 in that the gate plate having gate holes of at least 10 um and a gate electrode around the top of the gate

holes, said gate holes having an inclined inner wall; and spacers for supporting the gate plate between the cathode plate and the anode plate.

4. The remaining dependent claims are allowable for at least above reason.
5. The prior art made of record and not relied upon is considered pertinent to applicants' disclosure. None of recorded prior arts stands alone or combination with others discloses all limitation required in claim invention.

Remarks

Amendment filed June 26, 2006 has been entered.
